## **DETAILED ACTION**

### ***Drawings***

1. New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the drawing corrections filed on 15 December 2003 are informal and acceptable only for examination purposes. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

### ***Allowable Subject Matter***

2. Claims 1-22 are allowed.

3. The following is an examiner's statement of reasons for allowance:

The prior art of record fails to teach or suggest some of the limitations found in independent claims 1, 4, 10, and 16. With respect to independent claims 1, 4, and 16, the prior art of record fails to teach or suggest at least three optical transparent elements having a close thermal contact being used in co-operation, adjacent elements of the at least three elements having different material properties. With respect to independent claim 10, the prior art of record fails to teach at least three transparent optical elements; two of the at least three elements situated at each side of an optical

third element of the two elements being the partial, optical active media; the optical third element being a compensation space filled with an optical transparent compensation medium. Therefore, independent claims 1, 4, 10, and 16, as well as all dependent claims, are allowable over the prior art of record.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
